SUPERFORMANCE PRODUCTS

Product Listing

Gasket Materials List

Dura-Cork SC; Fine granule synthetic rubber & cork blend with a bonded steel core. This material is fuel and oil resistant with a recovery rate that allows for removal and reinstallation. The steel core adds rigidity and does not allow lateral movement in applications that see high vacuum or high pressure environments.

MP-15; Hi-Performance short strand synthetic fiber with high rubber content allows for excellent flex-ability and low flange pressure seal-ability. This material reduces fluid wicking compared to cellulose fiber materials. High compressive strength greatly reduces extrusion, shear and tensile strain and exhibits excellent bolt torque retention. Non Stick designation has an easy release coating on both faces of the gasketing material reduces tearing for frequently removed items. With an above average intermittent temperature rating of 400˚F this is a very versatile material for many applications.

N-80; Reinforced cellulose fiber with a nitrile binder. Medium compress-ability and low swell with very good crush resistance at high flange pressures have made this material a staple in the automotive market. Temperature rated up to 350˚F.

N-80 PC; Same base material as above but with two facing pieces mechanically bonded to a perforated steel core. This allows the gasket to remain stable at increased thickness and gives lateral rigidity for the base material.

HMM; Hybrid material composed of multiple fiber types that are chemically blended with multiple elastomer types to produce a High Performance Matrix material. The resulting benefits include excellent flexability, low flange pressure sealing, good bolt torque retention and reduced fluid wicking. Continuous temperature rated to 400ºF.

HCF; Dense compressed fiber. This material is mainly used where there are two machined rigid mating surfaces such as casting to casting. As an added benefit this is coated with anti-stick on both faces of material for easy removal.

Chevrolet Small Block

Intake Gasket Sets; 265-400

Port Size	Thickness	Material	Part Number
2.000" x 1.250"	.062"	N-80	6000
2.125" x 1.250"	.062"	N-80	6010
2.200" x 1.320"	.062	N-80	6020
2.320" x 1.320"	.062"	N-80	6030
2.380" x 1.380"	.062"	N-80	6040

Each set includes; 2 Silicone beaded intake face gaskets, steel core cork & rubber thermostat gasket and distributor gasket. Does not include intake end seals.

Intake Gasket Sets; Vortec

Port Size	Thickness	Material	Part Number
2.110" x 1.095" / 1.140"	.062"	N-80	6050
2.110" x 1.095" / 1.140"	.120"	N-80	6051

Each set includes; 2 Silicone beaded intake face gaskets, steel core cork & rubber thermostat gasket and distributor gasket. Does not include intake end seals.

Intake Gasket Sets; 18°

Port Size	Thickness	Material	Part Number
2.200" x 1.290"	.032"	N-80	6060
2.200" x 1.290"	.047"	N-80	6061
2.200" x 1.290"	.062"	N-80	6062
2.200" x 1.290"	.090"	N-80	6063

Each set includes; 2 Silicone beaded intake face gaskets, steel core cork & rubber thermostat gasket and distributor gasket. Does not include intake end seals.

Valve Cover Gasket Sets; 265-400

Application Years	Material	Part Number
1955-1985	.312" Dura-Cork SC	3116
1955-1985	.090" Dura-Cork SC	3117*
1955-1985	.047" MP-15 Non Stick	3118*

***For use on heads with machined gasket surface using cast or fabricated valve covers**

Introducing Our New Problem Solver

Carbon-X

Extreme Temperature Valve Cover Gaskets

Durability that will stand up to all the heat your HP manifolds can dish out!!
Perfect for use with O.E.M. cylinder heads and O.E.M. style stamped steel valve covers.

Can also be used on after market cylinder heads with any style valve cover.

Does not Burn, Shrink, Swell, Split or require constant re-torque.
Out performs all Cork & Rubber or Rubber Polymer gaskets!!

Available for Small Block Mopar Part #3180

And

Big Block Mopar Part #3184

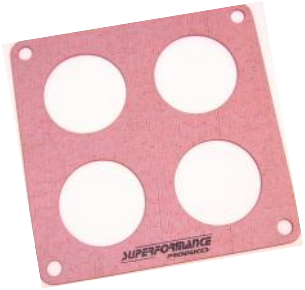
Premium Carburetor Base Plate Gaskets

Technology has evolved! Are you still using the old cellulose fiber style base gaskets that continue to squish out, give uneven torque distribution and stick to components?

We manufacture ours from MP-15 a Hi-Performance synthetic fiber with high rubber content that allows for excellent flex-ability and low flange pressure seal-ability. This material reduces fluid wicking compared to non synthetic fiber materials. High compressive strength greatly reduces extrusion, shear and tensile strain and exhibits excellent bolt torque retention. Easy release coating on both faces of the gasketing material reduces tearing for frequently removed items. With an above average intermittent temperature rating of 400˚F there is no doubt this is a premium material. Accurate throttle bore and bolt hole locations give you a perfect fit every time.

- **Reduces The Risk of Base Plate Warp Due to Over Torque**
- **Maintains Bolt Torque and Base Plate Integrity**
- **Reduces Fluid Wicking That Results in Gasket Degeneration**
- **Conforms Well to Minor Surface Imperfections**
- **Factory Applied Anti-Stick Coating to Both Faces of Gasket**



Applications

	Part #
Holley 4150, 4160 & Carter 4bbl., Open Plenum	4150
Holley 4150, 4160 & Carter 4bbl., 1.750” 4 Hole	4154
Holley 350 & 500 CFM 2bbl., 1.750” 2 Hole	4302
Holley 1050 & 1150, 4500 Dominator, Open Plenum	4500
Holley 1050 & 1150, 4500 Dominator, 2.000” 4 Hole	4504

Holley Gaskets

Due to the GREAT positive response from Professional Engine Builders and Racers using our Premium Carburetor Base Gaskets. We find it fitting to continue the unsurpassed quality tradition and introduce our ***NEW*** Premium Quality Fuel Bowl, Metering Block and Power Valve Gaskets for the popular Holley® based carburetors.

Key Benefits Unlike Any Other

Factory Applied Anti-Stick Coating, ***Does Not Stick!***
Highly Resistant to Gasoline ***and*** Alcohol
Temperature Rated Up to 400ºF
Flexible Synthetic Fiber & High Rubber Content
Maintains Proper Bolt Torque
Does Not Wick Fluids
Conforms Well to Minor Surface Imperfections

Application	Holley® Part	Part Number
Power Valve Gasket Fits All Models	1008-1597	4000
Fuel Bowl Gasket Fits Models; 2300, 4150, 4160, 4165, 4500	108-83	4010
Metering Block Gaskets Fits Models; 2300, 4150, 4160, 4165, 4500 (2 Circuit)	108-89	4022
Metering Block Gaskets Fits Models; 4500 (3 Circuit)	108-121	4023

TRACK KITS

Don't be without them!

Application	Contents	Part Number
2 Circuit Kit, 2300, 4150, 4160, 4165 & 4500 Double Pump	2-Fuel Bowl, 2-Metering Block, 2-Power Valve Gaskets & 8 Nylon Washers	4022-K1
3 Circuit Kit, 4500 Dominator	2-Fuel Bowl, 2-Metering Block, 2-Power Valve Gaskets & 8 Nylon Washers	4023-K1

Rear Crankshaft Seals

Our "Premium Sportsman Series" rear crankshaft seals are engineered to provide confidence in sealing a very demanding area of today's advanced racing engines.

MATERIAL

Unique blend of premium Fluoroelastomer rubber with friction reducers provides minimal parasitic losses and withstand intermittent temperatures up to 550˚F.

DESIGN

Special design sealing lip and parting surface area ensures confidence in sealing Dry Sump/ High Vacuum as well as Advanced Wet Sump applications.

RESULTS

Top engine builders in many forms of motor sports have realized the ease of use and sealing benefits provided by these products.

Current Applications

General Motors	Seal Type	Part Number
4, 6 and 8 cyl. S.B.	2 Piece	9350
Align Honed S.B. 400	2 Piece	9400
396-454 Big Block	2 Piece	9454
Chrysler Corp.	**Seal Type**	**Part Number**

Timing Cover Seals

Our quality **Double Lip Timing Cover Seals** are manufactured using rubber polymers formulated to withstand intermittent temperatures of up to 300˚F. All seals are backed by a garter spring on the primary sealing lip to ensure a positive contact with the sealing surface. Dust lip helps exclude unwanted contaminants from entering the primary sealing area to extend seal and shaft life.

Application	Seal Type	Part Number
Chevrolet; 4, 6 and 8 cylinder 283-400	1 Piece	8305
Chevrolet; 396-454 Big Block	1 Piece	8396
Chrysler; 273-360 LA, 361-440 B/RB & Hemi	1 Piece	8383

These products are offered packaged in individual sets and in bulk with quantity discounts. Let our 20 years experience with these products work for you.

Silicone Crankshaft Seals

Our Silicone Rear Crankshaft Seals are **O.E.M. Quality Double Lip** with advanced polymers formulated to withstand intermittent temperatures of up to 450˚F. These 2 piece split seals are used with confidence by many engine builders throughout the world.

Offset Lip Small Block Chevrolet seal will position the primary sealing lip to a unused area of the crankshaft to save groove worn sealing surfaces.

Application	Seal Type	Part Number
Chevrolet; 4, 6 and 8 cylinder 283-400	2 Piece Silicone	9283
Chevrolet; 4, 6 and 8 cylinder 283-400	2 Piece Silicone “Offset”	9327
Chevrolet; 396-454 Big Block	2 Piece Silicone	9396

These products are offered packaged in individual sets and in bulk with quantity discounts. Let our 20 years experience with these products work for you.

Valve Stem Seals

Our "Premium Sportsman 600 Series" valve stem seals are engineered to provide the very best balance of sealing ability with low drag. All seals use a compact metal body to fit inside your valve spring package.

MATERIAL

Unique Fluoro-polymer compound is enhanced by blending friction reducers for minimal parasitic losses.

DESIGN

A garter spring backed low-drag single lip wiper ensures positive contact with the valve through out its cycle.

RESULTS

Valve Stem Seals

Our "Premium Sportsman 700 Series" valve stem seals are engineered to provide the very best balance of sealing ability with low drag. All seals use a compact metal body to fit inside your valve spring package.

MATERIAL

Unique Fluoro-polymer compound is enhanced by blending friction reducers for minimal parasitic losses.

DESIGN

The 700 series uses a garter spring backed multi groove sealing element and ensures positive contact with the valve through out its cycle. All metal body with no rubber on the I.D. cerates a very slim profile to fit inside the tightest spring packages.

RESULTS

As a result of these characteristics top engine builders have experienced more consistent oil metering to all guides thus extending valve guide life.

700 Series Special Small O.D. For Triple Spring Use

Part Number	Size	Installed O.D.	Above Guide	Skirt Length	Overall Height
